

Product: Digital Imager Series
Application: Screen Print Masking, Flexo and Offset Platemaking
Printhead: Spectra® Galaxy PH 256/30
Ink Type: Hot Melt
Jets Per System: 256
Printhead Features: High Quality and Reliability

customer profile

*Don Ohlig,
Managing Director*

"Dimatix is a key partner for our digital products group. We developed a new series of imaging products using Dimatix technology. We plan to make these products a major part of our future growth."

*Don Ohlig
Managing Director of OLEC Corporation.*

Headquarters - Irvine, California

Galaxy PH 256/30

OLEC Corporation is recognized as the world leader in imaging and registration technology. OLEC develops products that influence many aspects of your daily life, from the newspaper you read to the computer you use. OLEC manufactures products for the electronics, photochemical machining, offset printing, flexographic printing, screen print, and digital imaging markets in its factories throughout the United States.

OLEC's imaging solutions are robust and versatile, offering significant benefits to the printing industry. The DSI series utilizing Hot Melt ink technology is suitable for screen masking and flexographic and offset plate making. The same product using UV Paste inks provides an extremely attractive plate making capability that allows printers to use less expensive uncoated aluminum plates.

OLEC's goal has always been to provide its customers with reliable, cost-effective imaging solutions. Its products are recognized for high quality reproduction, registration, dependability, productivity, safety, and convenience.

The OLEC Promise: OLEC is committed to continuous improvement of its products, services, and technological innovations. OLEC equipment is designed to improve resolution, provide accuracy of registration, and increase productivity resulting in higher yields. OLEC will provide exceptional value and support to its customers.
